Exhibition and Sponsorship Opportunities

The goal of USCID's 2018 Phoenix Conference is to present and discuss various concerns regarding water reuse and non-traditional sources of water for irrigated agriculture. Implications for groundwater recharge and environmental concerns will also be explored.

The Conference will provide a forum for water district staff, irrigation and drainage specialists, consultants, equipment suppliers and academics to share innovative solutions and learn from each other's experiences. Water resources professionals from around the world are encouraged to attend.

Conference information is online at www.uscid.org/18azconf.html.

Exhibition

Companies providing goods and services related to irrigation, drainage and water resources; water management; water operations and delivery; water conservation; drought management; and environmental issues are invited to exhibit.

Exhibitors will have an opportunity to summarize their products and services during a **Meet the Exhibitors** Session on Tuesday afternoon. The welcome reception will immediately follow the Meet the Exhibitors Session.
